

KING OF DEX

**THE WORLD'S RELIABLE
TOP QUALITY DEX**

W H I T E P A P E R

DESCRIPTION OF THE PROJECT

ABSTRACT

Decentralized exchanges (DEX) are a sort of cryptocurrency that enables secure online peer-to-peer cryptocurrency transactions without the need for an intermediary. A decentralized exchange have centralized components, meaning that a centralized authority retains some control over the exchange.

Users can trade directly from their wallets on decentralized exchanges by interacting with the smart contracts that run the trading platform. By utilizing liquidity Solutions such as other books liquidity pools, DEXs allow crypto investors to keep their keys while trading.

Every trade incurs a transaction cost in addition to the trading fee because decentralized exchanges are built on top of blockchain networks that supports smart contracts and where users keep custody of their assets. To use DEXs, Traders engage with smart contracts on the Blockchain. Automated market makers, order books DEXs, and DEX aggregators are the three basic forms of decentralized exchanges. All of them are smart contracts to allow users to trade directly with one another. Anyone with a smartphone and internet connection can benefit from the financial services offered by DEXs.

Why a decentralized platform

Because it does not stop at data. What would be the user of the data if we stop there?

Lower Risk of System Failure

Decentralized producers likelihood system failure. Almost everywhere there is hyperinflation and instability. One of the key reasons for this is to counteract that.

Introduction

The latest wave of Defi protocols, we have discerned various platforms occur that enables users to stake their funds in return for the protocols tokens.

The majority of this action has been focused on the Ethereum blockchain. As one of the fastest blockchains supporting smart contracts, it has a sprawling population of users, developers and equipment for building important decentralized application.

What is PrimeDexSwap?

PrimeDEX (\$primeDEX) is a decentralized exchange for instance swap of Bep - 20 token with unique features of limit orders, stop-losses, sniper, staking, yielding from NFTs and wallet cross chain networks lending, and many more.

About PrimeDexSwap (\$PrimeDEX)

PrimeDexSwap is built on binance smart chain considering its position in the smart ecosystem. Prime Dex contains unique features of limited orders, stop-losses, sniper, staking, yielding form NFTs and wallet cross chain networks, lending, and many more.

PrimeDex (\$PrimeDEX) is the dream home of traders on Defi world and can be seen as the uniswap of the Bsc network.

PrimeDex (\$primeDEX) uses an automated market maker (AMM) model. This implies that while you can swap digital assets on the platform, there isn't order book where you are filled with anyone. Rather, you trade against liquidity pool.

Limit Order

PrimeDex aims to bring in centralized exchange (CEX) features that allow PrimeSwap users and PancakeSwap to get their swaps at desired prices (better prices). For instance, if you think an asset is too expensive at the moment or you are

expecting price to drop to out the day simply set a limit order to buy at a price below the current market price.

The introduction of Limit Buy/Sell Orders is massive for Binance Smart Chain as it enables users to take profits on the platform and exit in time. PrimeDex users will now have the capacity to effectively buy dips/take profits to take advantage of volatile in the crypto market.

Stop losses

PrimeDex provides another trading features that allow PrimeSwap and PancakeSwap users to a maximum allowable loss by activating a market order once a stop price has been met. For instance, if you are holding a token but you would definitely liquidate everything if it were to loss 70% of its value to limit your loss, then you simply need to set the lowest maximum price you would sell and if the market price hit that, your assets are all sold.

Sniper

PrimeDex Sniper Both allows you to buy any newly token added from PancakeSwap, Dx sale in a fast speed rate. (Up to zero seconds from the time of the listing). PrimeDex Snipping will make a big profit for users who uses this new feature. \$PrimeDex snipping tool is quite easy to use, just place a wallet which the

bot will send the bought tokens. The bot only buys the token based on the input/amount you configure it to, remember it does not sell them.

Farm

PrimeDex (\$PrimeDEX) Farm is the method of staking or locking cryptocurrency in decentralized finance to earn rewards. The theory of \$primeDex farming is an aggregate called liquidity mining which has been developed from the decentralized financial sector. Generally a personal staking can earn in return for their participation in the application.

Limit Order, Stop Losses and Sniper Fees

PrimeDexSwap Limit Orders, Stop Losses and Snipper changes a 1.5% fee on transactions to reward liquid providers (LPs). A portion of these fees profits will be distributed to LP stakers, who receive a 500% annual percentage yield (APY). The rest of the profits go to PrimeDex Swap developers to further expand the project of Binance smart chain (Bsc).

PrimeDexSwap native token \$PrimeDex Token is used to pay for the limit order and stop losses fees and other features on the platform. All users are required to hold a \$PrimeDex balance to utilize the Prime Dex Swap functionally.

Stake

PrimeDex Swap (\$primeDEX) staking is the method of energetically contributing in the confirmation of transaction on the Blockchain with proof of (POS) mechanizing anyone with the lowest balance expected to Stake a particular cryptocurrency can also confirm transactions on the Blockchain and earn reward for this process.

The user assets reserved in a system that enables the staking operation for a specific duration of time and during the stage operation you can earn incomes for a specific duration of time. This process rewards users that have stake a quantity of assets in the network and play a role in the network strength. The locked of crypto asset or currency will provide to confirming all the hope of the stake holders in the network and keeps it growing.

NFTs

PrimeDex card is a utility that will be issued on our smart contract serve as a share/form of NFT, this will be given to initial investors who have participated in the presale via our contract address and buy with a minimum of 1 BNB through our presale page.

Cross Chain Wallet

PrimeDexSwap Cross Chain Wallet enables blockchain to communicate one another. This will be made available on IOS, android and web extension with several features.

Games

Today, the majority of games nowadays circulating are online games with a centralized network, this centralized network implies that all data both logins and passwords are stored on the server and regulated by the administrator or owner of the game app. This is different from the blockchain game and Dapp concept, no data stored and regulated by the administration system that is transparent.

Buy-back

Bi-weekly, buy-back strategy is the method of establishing the price and processing of PrimeDex Swap in circulation. This gives rise to each asset and has the ability for financial development of investors this strategy shows that the industry have enough equity to run the projects smoothly with the rewards and prices for investors in the form of primeDex token.

Lending

PrimeDex (\$PrimeDEX) lending is a form of direct lending of money to individuals or business without an official institution participating as an intermediary in the deal. PrimeDexSwap lending is generally done through our online platforms that match lenders with the potential borrowers. Due to some unique characteristics, primeDex lending is considered as an alternative source of financing.

Tokenomics

Token information

- ❖ Token name: PrimDexSwap
- ❖ Token symbol: PrimeDEX
- ❖ Token decimal: 18
- ❖ Token address:
- ❖ Token supply: 100,000,000 PrimeDEX
- ❖ Network: BEP-20
- ❖ Blockchain: Binance Smart Chain (BSC)
- ❖ Explorer:

Token Distribution

Private : 2%

Airdrop : 3%

Marketing & Promotion : 5%

Liquidity : 40%

Pre-Sale : 50%

Token Sale Information

Private-Sale

- ❖ Token Supply for Private-Sale Session: 100,000,000 \$PrimeDEX
- ❖ Private Sale Rate: 1 BNB = 20,000 \$PrimeDEX
- ❖ Private-Sale Minimum Purchase: 1 BNB

Pre-Sale

- ❖ Token Supply for Pre-Sale: 50,000,000 \$PrimeDEX
- ❖ Presale Round 1 Price: 1 BNB = 10,000 \$PrimeDEX
- ❖ Payment accepted: BNB only
- ❖ Purchase via: our website
- ❖ Minimum Purchase: 0.1 BNB
- ❖ Maximum Purchase: 20 BNB
- ❖ Soft Cap: 300 BNB
- ❖ Hard Cap: 500 BNB
- ❖ Pre-Sale Round 2 Price Rate: 1 BNB = 7,500 \$PrimeDEX

All raised funds will be utilized for projects, liquidity, listing fees on the exchange Bi-weekly Buy-Back Strategy, and expand the community.

NOTE: If soft cap not reach, the funds will be returned to all investors wallet address.

Airdrop

- ❖ Airdrop token allocation: 2,000,000 \$PrimeDEX
- ❖ Airdrop distribution Date:
- ❖ Airdrop reward: 200 \$PrimeDex
- ❖ Airdrop Referral rewards: 20 \$PrimeDEX

NOTE:

Our team will manually check the details submitted do not leave any of our social media till the airdrop distribution date to get the airdrop

Roadmap

Q1 2021

- ❖ Idea and team formed
- ❖ Platform developed

Q2 2022

- ❖ Launch PrimeDex Project
- ❖ Build the PrimeDex Community

Q3 2022

- ❖ Launch the airdrop
- ❖ PrimeDex Starts

Q4 2022

- ❖ List of PrimeDex Token on exchange like pancakeswap and locked liquidity
- ❖ List of PrimeDex Token on Coin marketCap
- ❖ List of PrimeDex Token on Coingecko
- ❖ PrimeDex Airdrop distribution
- ❖ PrimeDex Application Launch

Q1 2023

- ❖ List PrimeDex Token on 4 big exchanges
- ❖ Vip Card distribution (NFTs)
- ❖ Bi-weekly Buy-Back Strategy Starts

Q2 2023

- ❖ PrimeDex partnership program
- ❖ Enable primeDex CARD (NFT)
- ❖ Airdrop for primeDex CARD holders

Q3 2023

- ❖ PrimeDex Game Launch
- ❖ PrimeDex Trading Competition
- ❖ Cross Chain Wallet Network Launch
- ❖ Roadmap updates
